Barbara Underwood
New York State Attorney General
The Capitol
Albany, New York 12224-0341

Dear Attorney General Underwood:

The democrats keep stating that “No one is above the law” and then you blast President Trump.

Attached is a letter being sent to Albany County Executive Daniel McCoy and other Albany City and Albany County officials detailing the corruption in the Albany County District Attorney’s office and the Albany County judges and how they obtain illegal convictions using torture and depriving litigants of their constitutional and statutory rights. There are links to court documents and newspaper articles supporting my allegations. Documentation is also on my website www.justice4ny.com. Read the Scoops and watch my videos detailing the corruption in the New York State judiciary.

Please explain why the New York State Attorney General’s Office supports these illegal actions and refuses to investigate them. Why should anyone be tried, convicted and sentenced to jail being deprived of their constitutional rights to a public trial, a jury trial and a court of proper jurisdiction? Why should judges and district attorneys be allowed to fix cases? Your office has supported these illegal actions in the past. How many more veterans, their family members, blacks and other minorities have been stripped of their constitutional and statutory rights in Albany County and how much longer is this to continue? How many more children are going to be allowed to be abused by the judges, law guardians and social workers?

Why shouldn’t those who violate constitutional and statutory rights be held accountable for the actions? It is because they are democrats?

You and your office all took an oath of office to support both the New York State and Federal Constitutions. Did your oath of office mean anything to you and your assistants?

I am sure nothing will be done because it is more important to protect the corrupt judges and district attorneys and their assistants especially if they are democrats.

Respectfully yours,

Charles E. Collins
